Computer Methods in Applied Mechanics and Engineering 105 (1993) 447–448
North-Holland

Cumulative contents of Volume 105

Volume 105, No. 1, May 1993

Lanczos algorithm for the quadratic eigenvalue problem in engineering applications [CMA 347]
C. Rajakumar 1

An analysis of element-by-element preconditioners for nonsymmetric problems [CMA 346]
M.B. van Gijzen 23

An exposition of the material derivative approach for structural shape sensitivity analysis [CMA 344]
J.S. Arora 41

Theory and computation of the steady state harmonic response of viscoelastic rubber parts [CMA 348]
A.B. Zdunek 63

Numerical computation of Schwarz–Christoffel transformation for simply connected unbounded domain [CMA 350]
J.M. Chuang, Q.Y. Gui and C.C. Hsiung 93

Rotation angles [CMA 322]
W.C. Hassenpflug 111

Virtual bubbles and Galerkin-least-squares type methods (Ga.L.S.) [CMA 345]
C. Baiocchi, F. Brezzi and L.P. Franca 125

Response amplitude probability functions of a hardening Duffing oscillator subjected to filtered white noise [CMA 353]
P.K. Koliopulos, S.R. Bishop and G.D. Stefanou 143

Volume 105, No. 2, June 1993

Computational aspects of large elastoplastic deformations in the presence of anisotropy and plastic spin [CMA 356]
B. Loret, F. Hammoum and Y.F. Dafalias 151

Thermoelastic frictional contact problems: Modelling, finite element approximation and numerical realization [CMA 354]
L. Johansson and A. Klarbring 181

Vibrations of multispan all-round clamped stiffened plates by modified dynamic edge effect method [CMA 351]
I. Elishakoff, A. Sternberg and T.J. van Baten 211

Assumed strain stabilization of the eight node hexahedral element [CMA 349]
T. Belytschko and L.P. Bindeman 225

Boundary element methods for convective heat transfer [CMA 355]
Y. Shi and P.K. Banerjee 261

Convergence analyses of Galerkin least-squares methods for symmetric advective–diffusive forms of the Stokes and incompressible Navier–Stokes equations [CMA 357]
L.P. Franca and T.J.R. Hughes 285

Volume 105, No. 3, June 1993

Finite element spaces with discontinuity capturing, Part I: Transport problems with boundary layers [CMA 359]
E.G. Dutra do Carmo 299

A Galerkin finite element technique for stochastic field problems [CMA 368]
S.A. Ramu and R. Ganesan 315

A study of the transport process of buoyancy-induced and thermocapillary flow of molten alloy [CMA 362]
W. Shyy and M.-H. Chen 333

Random vibration of structures by the finite element method [CMA 364]
I. Elishakoff and L. Zhu 359

The splitting pinball method for contact-impact problems [CMA 360]
T. Belytschko and I.S. Yeh 375

Element diameter free stability parameters for stabilized methods applied to fluids [CMA 358]
L.P. Franca and A.L. Madureira 395

Implementation of a one-equation turbulence model within a stabilized finite element formulation of a symmetric advective–diffusive system [CMA 361]
K. Jansen, Z. Johan and T.J.R. Hughes 405
